Occupational Health

We promise to never lose sight of why we're here: Your business. Your employees.

Your partner in health care

We believe that your employees are more than just employees. They are caregivers, family members, friends, parents, siblings, spouses — each unique individuals with their own identities. Our Occupational Health team of experts understand that a healthy workforce is a productive workforce and supporting employers in our communities means supporting your employee's total well-being — not just when they are sick or injured.

We understand that navigating the health system for your employee team can be complex and confusing. To help you, we are able to be your partner.

CentraCare Occupational Health experts and clinicians work right along side you and your workforce to build a custom program that fits your companies unique needs.

Our holistic approach to employee health allows you to optimize your workforce effortlessly and effectively.

This means you'll receive personalized services that save your business time and money, including — but not limited to:

- Drug Testing
- Pre-employment and DOT assessments
- Guidance on preventative care practices before injuries happen
- Onsite services
- Wellness opportunities for your workforce

And if injuries occur, we provide:

- Work Injury Management
 - Access to care, across a large health care organization, in many communities
 - A wide range of specialties and experts
 - Quicker referral systems (such as the urgent care model)
 - Help navigating what can be a complex health care system

Your business and your employees will benefit from enhanced health, making your workplace safer and healthier.

Not sure what services your workforce needs?

Whether your pre-employment clinical needs are guided by Federal or State authorities, or you want to minimize the cost of injuries through proactive measures, reach out to one of our locations for a free consultation.
